

KINGSFORD SMITH DRIVE UPGRADE

Project construction update

November 2017

During November 2017, the Kingsford Smith Drive upgrade will continue major construction activities.

Land-based activities between Amy Street and Theodore Street will include:

- street light and traffic signal work
- drainage activities
- investigation and installation of underground services
- major earthworks
- removal of centre median
- pavement construction, asphalt works and line marking
- footpath construction and landscaping
- relocation of concrete traffic barriers
- ground improvement works.
- selected tree removal in accordance with all required approvals.

Marine-based construction activities will include:

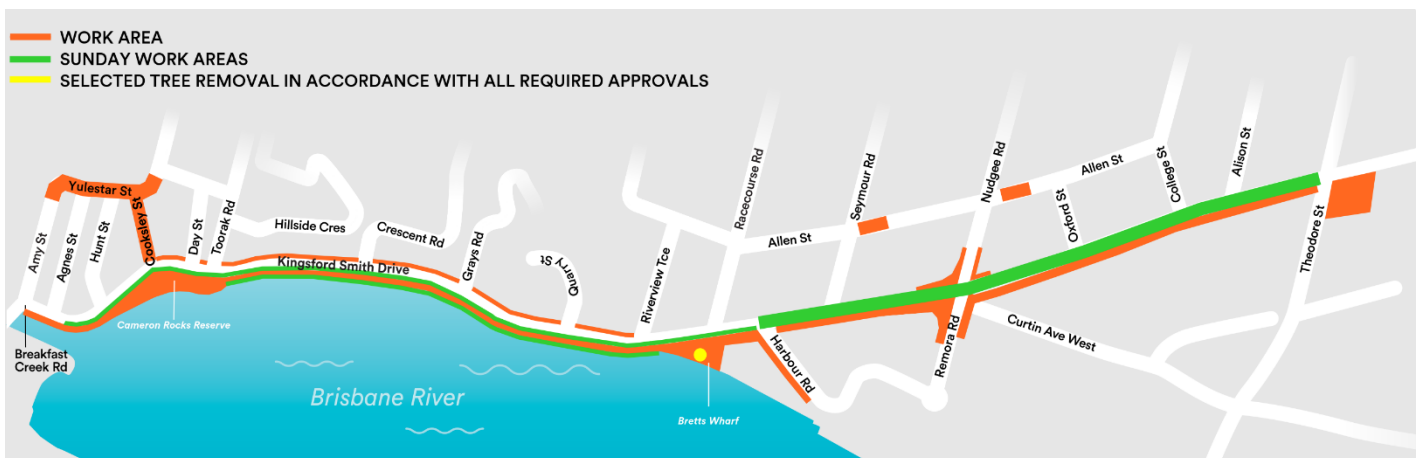

- installation of scour protection devices
- excavation of the existing river bank retaining wall
- ground improvement works
- piling for the new river walk structure
- production and installation of precast concrete segments that will be used in the river walk structure
- concrete truck deliveries to Bretts Wharf and Cameron Rocks Reserve.

Work will involve:

- use of construction equipment including excavators, trucks, compaction equipment, road saws, vacuum excavators, concrete trucks, small cranes, barges, piling rigs and pumps
- noise associated with the use of construction equipment
- light associated with the use of temporary lighting towers
- vehicles and equipment with flashing lights and white noise (non-tonal) reversing beepers for the safety of onsite workers
- changed traffic conditions including lane, footpath and parking closures and traffic control and signage to direct pedestrians, cyclists and motorists, as required
- barge movements across the river
- night work and Sunday work as required.

Why are these works happening?

The Kingsford Smith Drive upgrade will improve the road capacity to meet the future needs of the traffic network on one of Brisbane's busiest roads. The upgrade involves widening the road from four to six lanes between Theodore Street at Eagle Farm and Cooksley Street at Hamilton and improvement works between Cooksley Street and Breakfast Creek Road at Albion.

KINGSFORD SMITH DRIVE UPGRADE

Temporary road closures – Cooksley Street, Albion and Toorak Road, Hamilton

To enable major stormwater and water main installation works, traffic closures are required on Cooksley Street and Toorak Road. Detours will be in place for all traffic movements during the closure periods. Access to local streets and properties will be maintained by traffic controllers at all times, and signage will be in place to direct all motorists.

From **9am Friday 3 November to 5am Monday 6 November 2017**, Cooksley Street will be closed in both directions between Yulestar Street and York Street.

From **Monday 6 November 2017 to early 2018**, Toorak Road will be closed to all traffic at the intersection of Kingsford Smith Drive.

For detailed detour maps and more information about these works, visit www.ksdupgrade.com.au

Bus stop relocation and pedestrian changes at Riverview Terrace from early November 2017

From early November 2017, the inbound bus stop at Riverview Terrace will be relocated approximately 150 metres closer to Racecourse Road. The new bus stop location can be accessed via the pedestrian crossing at Racecourse Road. The existing pedestrian crossing at Riverview Terrace will be closed following relocation of the bus stop. All changes will be clearly signed.

Upcoming changed traffic and pedestrian conditions – Seymour Road to Theodore Street, Hamilton

Over the coming months, traffic and pedestrians will be moved to the newly-constructed southern lanes and footpath to allow construction to commence on the northern side of Kingsford Smith Drive. Traffic barriers will be installed on the northern side of Kingsford Smith Drive to delineate this construction area. These changes will be in place for approximately 18 months.

The northern footpath between Harbour Road and Woonah Street will be local access only during this stage of construction and there will be changes to outbound bus stops. Access to local streets and properties will be maintained by traffic controllers at all times, and signage will be in place to direct all motorists.

The Lendlease Community Relations Team will work closely with affected businesses and residents throughout construction to minimise the impact of these works.

More information regarding these works will be provided to motorists and local residents in the coming months.

Construction hours

From November 2017, standard marine construction hours will be from 7pm Sunday to 6pm Friday, and 8am to 5pm on Saturday and Sunday. Some works may be required outside these hours due to tidal and weather conditions. Where night works are required, the noisiest works will be completed early in the shift to minimise impacts on the community.

Civil construction activities take place from 7am to 6pm Monday to Friday and 8am to 5pm on Saturday. There will be work on selected Sundays. Due to traffic permit requirements, some work must take place at night between 7pm and 5am, Sunday to Thursday. Wherever possible, the noisiest works will be completed early in the shift to minimise impacts on the community.
